Profile

A Telematic Engineer graduate turned DevOps Engineer, specializing in cloud computing across multiple providers, with a strong emphasis on Infrastructure as Code (IAC) and automation. Experienced in Go, Python, and JavaScript, my journey started in infrastructure, reliability, and monitoring, evolving into a passionate programmer ready to tackle new challenges.

Education

Telematics Engineering Aug 2019 - Sep 2023
Pontificia Universidad Católica Madre y Maestra, Distrito Nacional
GPA: 3.7/4 (Magna Cum Laude)

Employment

DevOps Engineer Feb 2023 - Present
GBH, Remote
As a DevOps Engineer, I'm responsible for optimizing the software development life cycle from coding to maintenance, ensuring efficiency and stability. I monitor system health at all stages, implement best practices, and develop advanced solutions, such as CLI tools using Go, Python, and Bash.

DevOps Consultant Jul 2024 - Present
OGTIC, Remote
My role at OGTIC involves creating workflows using GitHub Actions, developing and maintaining Helm charts for new applications, and ensuring the scalability and reliability of Kubernetes clusters.

Technical Support Jul 2022 - Jan 2023
EmpowerHR, Distrito Nacional
Troubleshooting platform client issues
Design of taxes calculation formulas in PHP
Implementation of solutions for customers payrolls reports

Projects

Cloud Consultant
Cloud consultant is a web applications written in JavaScript and Python to deploy infrastructure on cloud automatically.
